

# CP1520 Final Exam

Complete this exam by replicating the website shown in the screenshot on the following pages. Focus on the bigger aspects of the page (**layout, responsiveness, content**)—do not get caught up on the finer details (colors, text-size, exact spacing).

**Submit to the Dropbox by 4pm** (late submissions may receive a late penalty)

## Grading Specifications

### OVERALL LAYOUT — 40%

- The overall page layout is displayed using a **flexible layout** as shown in screenshot #1
- The layout of the page should change at **900px** to resemble screenshot #2
- The page consists of 4 sections—header, main, aside, and footer.
- Black borders are used in the main, aside, and footer to give the appearance that they are on a black background.
- The page should have a maximum width of **1200px** to prevent stretching as shown in screenshot #1

### NAVIGATION — 30%

- Navigation elements are displayed using **flex**, but you can use any spacing method for the nav elements (do not worry about exact spacing here)
- There are hover effects on the links (screenshot #3)
- The navbar should change to a more mobile-friendly style at **600px**
  - Note the changes to hover effects at this size (screenshot #4)

### HOME PAGE + SIDEBAR + FOOTER (text styles)— 10%

- Pay close attention to how the text is styled on the main page, the aside, and the footer.

### ABOUT PAGE (table) — 10%

- Style and content of the table should match the table screenshot #5

### CONTACT (form) — 10%

- Non-operational form should contain all of the elements of the form in screenshot #6
- Form elements are displayed using **flex**, but you can use any spacing method for the form elements (do not worry about matching exactly)

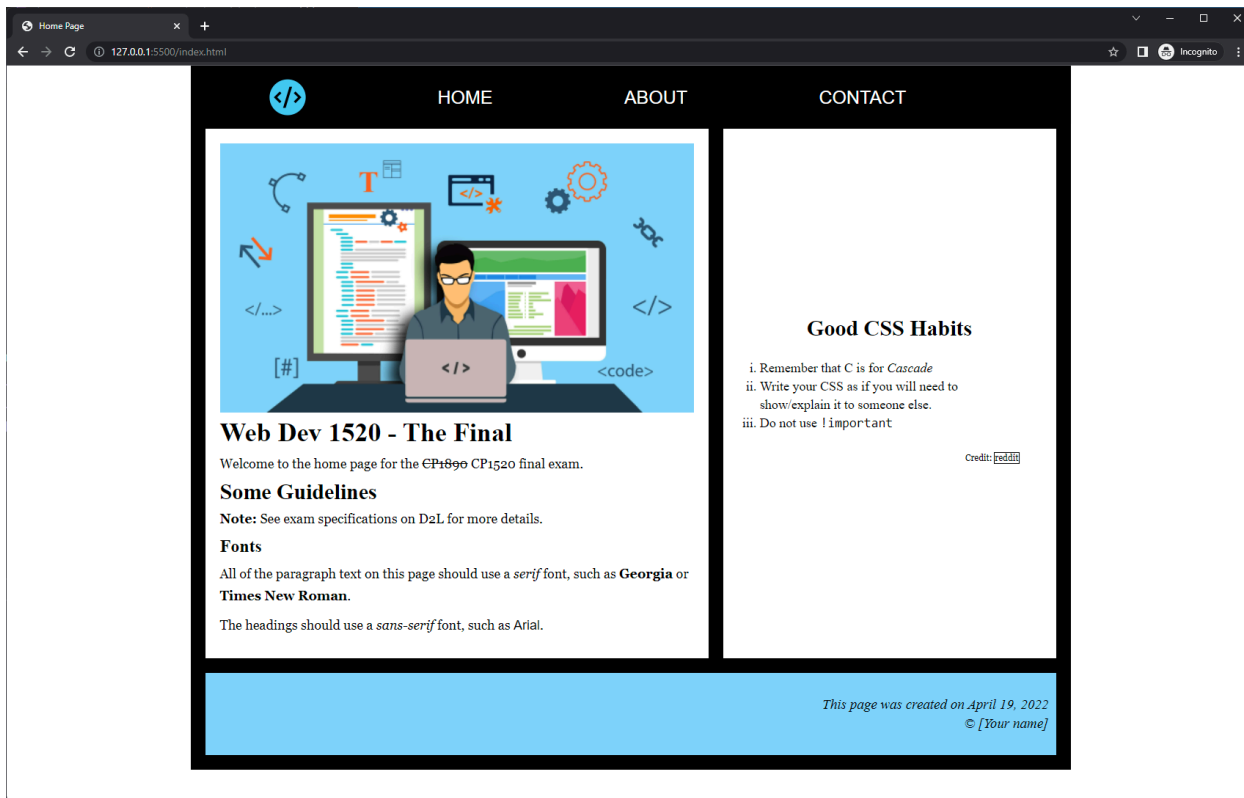

## Assets

Images, links, and text used on the page are provided in the **final\_exam\_start.zip**.

The screenshots on the following pages are also included in the zip file.
